

POW!

Pubnet Order Wizard

*Providing the Power
of EDI
Without the Expense*

www.Pubnet.org

POW Requires:

- A supplier who is receiving or will receive minimal EDI orders
- A computer with access to the World Wide Web (www)
- A web browser supporting frames and Java scripts
- No internal technical expertise
- A willingness to experience the efficiency of EDI

From POs to Packing Slips

Electronic Data Interchange (EDI) technology has proven to increase efficiency in the supply chains of those few who could afford it. Now, Pubnet offers suppliers who have not implemented costly EDI technology with an affordable alternative – POW!

POW is a web-based forms interface that allows suppliers to perform various EDI functions via the Web, including:

- Receiving 850 PO Requests
- Replying to POs with Standard 855 POAs
- Sending Advanced EDI Documents sets including, 810 Invoices and 856 Advanced Ship Notices (ASNs)
- Printing Packing Slips and Shipping Labels

Publishers, wholesalers and distributors who would like more information about POW, email guy.tripp@bowker.com
